Telephone number	0038651353907

Skupina Primera is Erasmus+ course provider based in Slovenian capital, Ljubljana. With a team of highly experienced trainers and coaches we support teachers in their personal and professional development. We offer teacher in-service trainings since 2011. In the year 2017 only we hosted around 300 teachers from different European countries.

Currently we offer 14 different courses. Topics are diverse, but they are focused on development of teachers' interpersonal skills (communication, relationships, coaching), problem-solving skills (creativity, entrepreneurship and science teaching), well-being in classroom (stress management, positive psychology) and classroom management (violence prevention, multiculturalism, preventing school leaving).

On national level we work with The National Education Institute Slovenia in the field of peer coaching. We cooperated in developing and implementing a basic and advanced peer coaching programme for teachers. In the last four years we trained more than 200 teachers for using peer coaching method in classrooms, in relationships with parents, and in supporting colleagues in professional dilemmas.

As our second field is also working with private companies we can successfully build bridges between world of business and world of education. Within the private sector we work as human resource management consultancy. Our projects focus on competencies models for different professions, psychometric assessments, soft skills trainings, and leadership development.

We have successfully implemented various projects with private and public institutions. Our experts are also active in European partnerships within the Erasmus+ programme.
